

# SolarDoc

Solar Document Generation

## Solar documents, done in minutes

Capture consumer details, track installations, and generate subsidy-ready reports — on web and in the field.

Secure & Reliable

Web + Mobile

Team Ready

Cloud Safe

### Paperwork shouldn't slow solar installs

Teams lose hours chasing consumer forms, director details, and compliance PDFs. SolarDoc keeps project data and reports in one place so field and office stay in sync.

### Built for solar installers and EPC teams

SolarDoc is a practical platform for managing consumers, directors, and installation documentation — with digital reports you can generate when you need them.

## Everything you need in one platform

#### Consumer management

Store project and consumer records without spreadsheets.

#### Director records

Keep authorized signatory details ready for documentation.

#### Progress dashboard

See completed and in-progress work at a glance.

#### Report generation

Create subsidy and stamp-related documents from your data.

#### Web + mobile

Office on desktop, field teams on Android / iOS.

#### Team-ready access

One company account with clear roles for your operations.

### How it works

### Who it's for

- Solar installers
- EPC companies
- Sales and field teams handling consumer onboarding
- Ops teams preparing regulatory / subsidy paperwork

# SolarDoc

Solar Document Generation

Simplifying documentation. Powering solar installations.
